### Who or What am I?

Can you figure out who or what I am? Try it!

1. We're from Europe, Asia, or Northern Africa. We harm pine trees by using the trees for reproduction and feeding. What are we?

---

2. I produce lots of bright orange berries. I'm able to grow in deep shade unlike other invasive plants. What am I?

---

3. We help control the increase of spotted knapweed by laying eggs on the flowerhead of the spotted knapweed. What are we?

---

4. I eat frog eggs in the water. Scientists studied a relationship between me and Pacific tree frogs. What am I?

---

5. I'm a fatal disease for oak trees. Scientists believe that I arise from a fungus-like organism. I spread very quickly. What am I?

---
