

Editor's Note

This issue of *Wildland Weeds* represents my first as editor, with Tom Fucigna as assistant editor. I would like to raise a frosty glass to the able editorship of Amy Ferriter, who began with the Winter 1997 Charter Issue and proceeded all the way through the Spring 2002 issue. *Thank you, Amy, for all of your hard*

work! I look forward to editing *Wildland Weeds* with the energetic assistance of Tom, and hope that we can contribute to this important publication.

My first chosen task was to prepare an index to the issues of *Wildland Weeds* under Amy's editorship. This should prove a useful tool both to Tom and I, as new editors, and to the readers and contributors of *Wildland Weeds*. It also illustrates the wide array of topics

and plant species covered in these pages so far.

I thank those who contributed to this issue and look forward to working with future contributors, the editorial committee, and the members of FLEPPC. Please feel free to contact me regarding ideas you may have for future issues of *Wildland Weeds*.

Karen Brown, Editor
